## Front End Web Developer

### Description

We are seeking an enthusiastic and experienced front end web developer to build Web Applications. Using best of breed technologies in the front end, open source and public cloud, you will build a data-driven solution.

### Responsibilities

You will take on the following responsibilities:

- Front end development in AngularJS, Javascript, CSS, and other technologies;  
A high impact role that works directly with business users on a highly visible project within the firm. You should possess the following qualifications:
- Exceptional coding and software design ability.
- Knowledge of user interface, layout, typeface, web, and mobile design standards.
- Familiarity with JQuery and AJAX libraries.
- Experience with content management systems, such as WordPress, Joomla, Drupal.
- Understanding of mobile browsers and design, including responsive design and mobile web.
- Experience with multiple languages, especially on the front end: Javascript, UI frameworks such as React.js or Angular, HTML5, CSS3. Java and Python are a major plus.
- Experience with UX and UI testing also desired.  
A strong academic record with a degree in Computer Science, Computer Engineering, or a scientific discipline.
- An obsession with building quality and well-designed software.  
We are open-minded in our search for critical thinkers who are passionate about technology.
- Ability to manage projects, meet deadlines, and stay on track.

We are proud to be an equal opportunity workplace. We do not discriminate based upon race, religion, color, national origin, sex, sexual orientation, gender identity/expression, age, status as a protected veteran, status as an individual with a disability, or any other applicable legally protected characteristics.
